

The logo features a large white '20' on the left, with a stylized globe icon integrated into the '0'. The globe has a grid of latitude and longitude lines. To the right of the globe, the letters 'BS' are written in a bold, orange, sans-serif font. Further right, the word 'STAINLESS' is written in a white, bold, sans-serif font. The entire logo is set against a blue background that features a faint, semi-transparent image of an industrial facility with tall chimneys and a large cylindrical tank.

2025 BS STAINLESS

GLOBALLY SUPPLIED QUALITY

WHO WE ARE

We are a UK based international distributor of stainless steel products. We specialise in a variety of products such as precision strip, coil, wire, sheet and plate. We are also a specialist manufacturer of metal jacking and ancillary products. Our warehouse holds a vast amount of stock in excess of 3000 tonnes that can be processed and packaged to meet our customers' requirements.

We have been active in the production, processing and supplying of metals to industries for over 20 years. As a leading supplier of stainless steel wire and an innovative manufacturer of metal jacking, our vast catalogue of products is distributed to over 50 countries worldwide and we ensure to hold enough stock to deliver minimal lead times, catering to the varying demands of our customers.

Products

From our head office in Preston, Lancashire, we offer a wide range of products and services to suit various industries. Closely linked to all major motorway networks, and easy access to all UK ports, we offer fast, reliable access to our huge stock of Stainless-steel wire, strip, plate, coil and sheet. Additionally, we provide metal jacking, ancillaries, fasteners, aluminium, Aluzinc, aluminized steel, acoustic products and more.

- Processing techniques such as slitting, rewinding and cut to length.
- In-house deburring and edge dressing of stainless steel coil and blanks.
- Sheared to size stainless steel blanks.
- Shaped wire.
- Coil coating.
- Specialist nails, rivets and fastenings.

Services

In addition to our range of products, we have the capability to provide custom services:

For international business we have the ability to arrange specific packing such as crates, heat treated pallets and have the facility to load both 20ft and 40ft shipping containers.

In addition, we can also manage LCL, FCL and air freight shipments.

“Span over 50 countries worldwide”

Truly Global Enterprise

From our head office in Preston, Lancashire, we have provided products and services to multiple sectors that span over 50 countries worldwide. There is no limit to our reach as we continue to develop within growing markets and territories.

Industries

We supply products that support a diverse and wide assortment of industries including construction, oil and gas, transportation and chemical. We are constantly looking to innovate with our extensive range of suppliers to offer products and solutions that are not only unique in their design but competitive in their price.

Quality

We are proud to work closely with industry and academic partners to continually improve our products and services, as a result, we have patented products designed to save you time and money. We operate within the scope of ISO 9001:2015 accredited management system and the raw materials are procured from suppliers in compliance with ASTM, BS EN and DIN standards. Our products are rigorously inspected to ensure they are within tolerance of our customer's specifications, we work with accredited laboratories for specialised material testing and chemical analysis. In addition, we use x-ray fluorescence technology to meet our high inspection standards and to ensure that our customers get the best quality products.

Staff

Using the knowledge and expertise held by our staff on the steel and metal industry, and

our close association with organisations like the British Stainless-Steel Association (BSSA), we offer a world-class service in advising on material usage, grades, and specifications, to help the systems' life expectancy, and guiding you through the wide range of capabilities and processes we offer that can be tailored to meet your requirements. Furthermore, with a dedicated logistics team, we can see products from our door, through to yours to deliver hassle-free distribution.

“We operate within the scope of ISO 9001:2015 accredited management system and the raw materials are procured from suppliers in compliance with ASTM, BS EN and DIN standards.”

Corporate Social Responsibility

To help the environment we recycle 100% of any offcut material we produce. We go further by separating our material into their respective grades to help ensure the long-term sustainability and authenticity of the metal.

To minimise waste timber pallets, we reuse them where possible and collect used pallets from our customers on request.

For our wire products we try to produce as much as possible on carry less cores, therefore reducing packaging, when our customers require steel formers, these can be supplied and returned.

We take steps to ensure a reduction in our effects on environmental and social wellbeing. Therefore, we consider our social responsibility as a priority with policies on anti-bribery and tax evasion. Furthermore, we audit our suppliers to ensure that, not only their quality procedure but also their social and ethical policies including anti-slavery and human trafficking are in line with our own.

Research and Development

At BS Stainless Ltd, we are more than just a supplier of stainless steel. We are dedicated to sustaining a long-term supply partnership with our customers. Therefore, we work

closely with our clients to provide solutions to their needs. This could be through the development of a coating to increase production efficiency, or a more cost-effective solution in the manufacturing of metal jacketing or cladding systems.

We have worked in collaboration with several universities around the UK, including Sheffield Hallam, UCLan, and The University of Salford. One such instance was a 3-year project with Sheffield Hallam University where we carried out an international investigation with the oil and gas industry. How can we improve the

Our work with these academic bodies has also lead to the development of our own engineering team. By continually looking at innovative ways to improve our products and services, we have had journal and conference papers published on them, and we can even boast a growing range of patented products.

efficiency of the metal jacketing system delivering cost-effective solutions? Through extensive research and development, we proposed the idea of laminating high-performance coatings onto the metal. As a result, we developed the innovative range of high quality, metal jacketing systems that we supply today and continue to expand.

Oil and Gas

BS Stainless Ltd offers many solutions to provide efficient production within the oil and gas industry. Whilst our main activity is to supply metal for thermal insulation for oil and gas plants, we are also used for many products including precision slit coil, plate and stainless steel wire.

We have been the supplier of choice, involved in major gas projects worldwide. From the development of LNG plants in Australia or Qatar, to oil and petrochemical processing sites in Saudi Arabia or Kazakhstan. Our materials have also been used for LNG receiving, re-gasification and storage plants both in the UK and worldwide.

The reason we have been so successful in this industry is due to our ability to deliver the full package. We can manufacture all the metal jacketing solutions from moisture barriers to Tedlar® coatings, enhanced by our innovative acoustic barriers. We also supply all the related ancillary products associated with metal jacketing and control all logistics to deliver these products worldwide as a complete package.

We have a reputation for quality and we work within the scope of ISO 9001:2015 accreditation. We are also recognised by many FEED, EPC's and owners worldwide..

Construction

As stainless steel is widely used for building and architectural applications, we have a wide range of products that are used within the construction industry. Products include stainless steel wire for cavity wall ties, stainless steel plate for lintels and wind posts, or stainless steel strip for section rolling's.

We work closely with the construction industry and with constant investment in new products and machinery we are continually improving to meet their changing demands and regulations.

In addition, due to our knowledge of this sector, we carry large stocks of feed material and finished products that allows us to offer a just in time service on many of our products. We can also provide a 'call off' stocking service that improves your cash flow and cuts down on lead times.

Transportation

We have the capability of supplying a variety of products suitable for the transportation, automotive and railway industry. Stainless steel wire, precision slit coil or cut to size blanks are all used to cover the needs of any modern transportation system. Our wire material is used to manufacture grills, mesh filters or simple hooks and fixings.

We have many processes inhouse that are designed to suit this sector. For example, we can slit stainless steel coil to highly accurate tolerances and de-burr blanks. We have machines that slit, wind, shear, edge dress, pack and label, and supplying in line with our ISO 9001:2015 accreditation, you can rely on

us to deliver high quality produce that's fit for purpose.

Furthermore, we can even supply MIG and TIG welding wire and rods in addition to special performance grade stainless steel.
